Operating modes

PMA.studio can be used in different ways. The basic mode of operandi is Full mode, which allows one to view and annotate whole slide images. In addition to full mode, however, the viewer can also be run in Embedded mode (within an html iframe). Finally, a separate administrative interface is available to configure the interaction with other components of the platform, as well as the behavior of the various in the various operating modes.

Full mode

Embedded mode
