

How to Add a Slidebox

1. When to Use a Slidebox

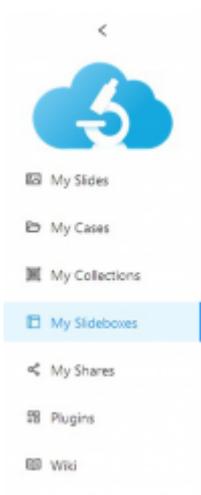

Once you've uploaded some slides and created at least one collection, you can create a slidebox. A slidebox allows you to group and organize collections. Here you can also add metadata to your collections.

Typical use cases for slideboxes include:

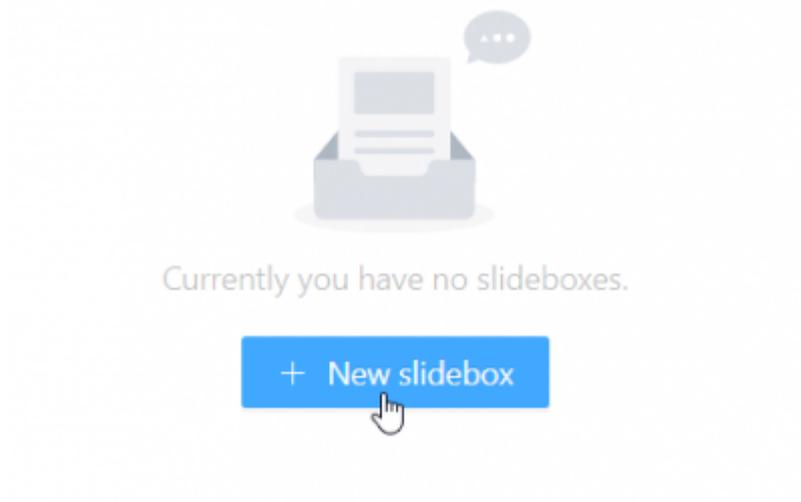

- Preparing students for an end-of-year exam by grouping all relevant teaching collections in one slidebox.
- Organizing case collections from multiple hospitals for pathologists working across different sites.
- Structuring multiple timepoints in a longitudinal study.

2. Walkthrough

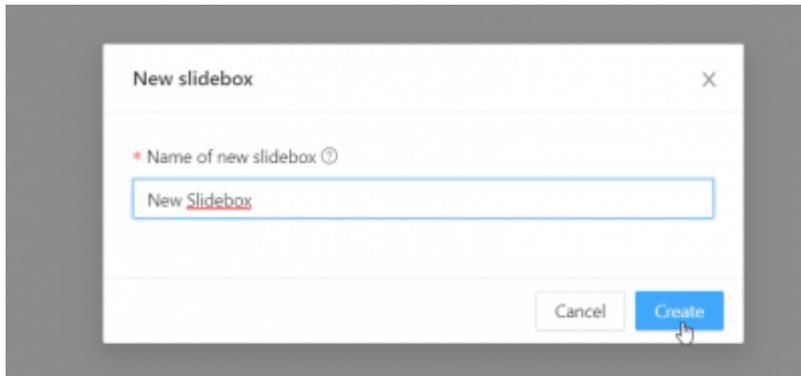

1. Go to “Slidebox” in the sidebar

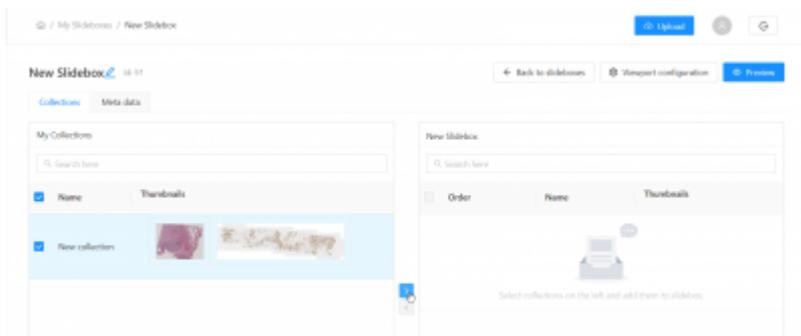

2. Click on “+ New slidebox” in the middle of the page

3. Choose a name for your slidebox and click on "Create".

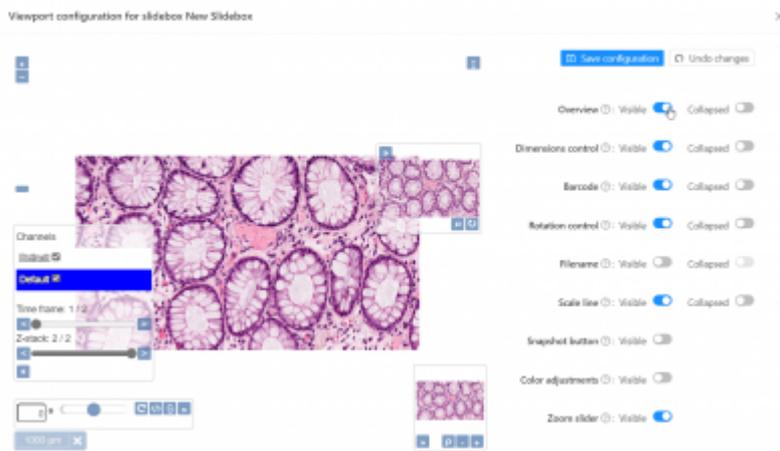

4) Select the content which you want to add to your slidebox and press ">".

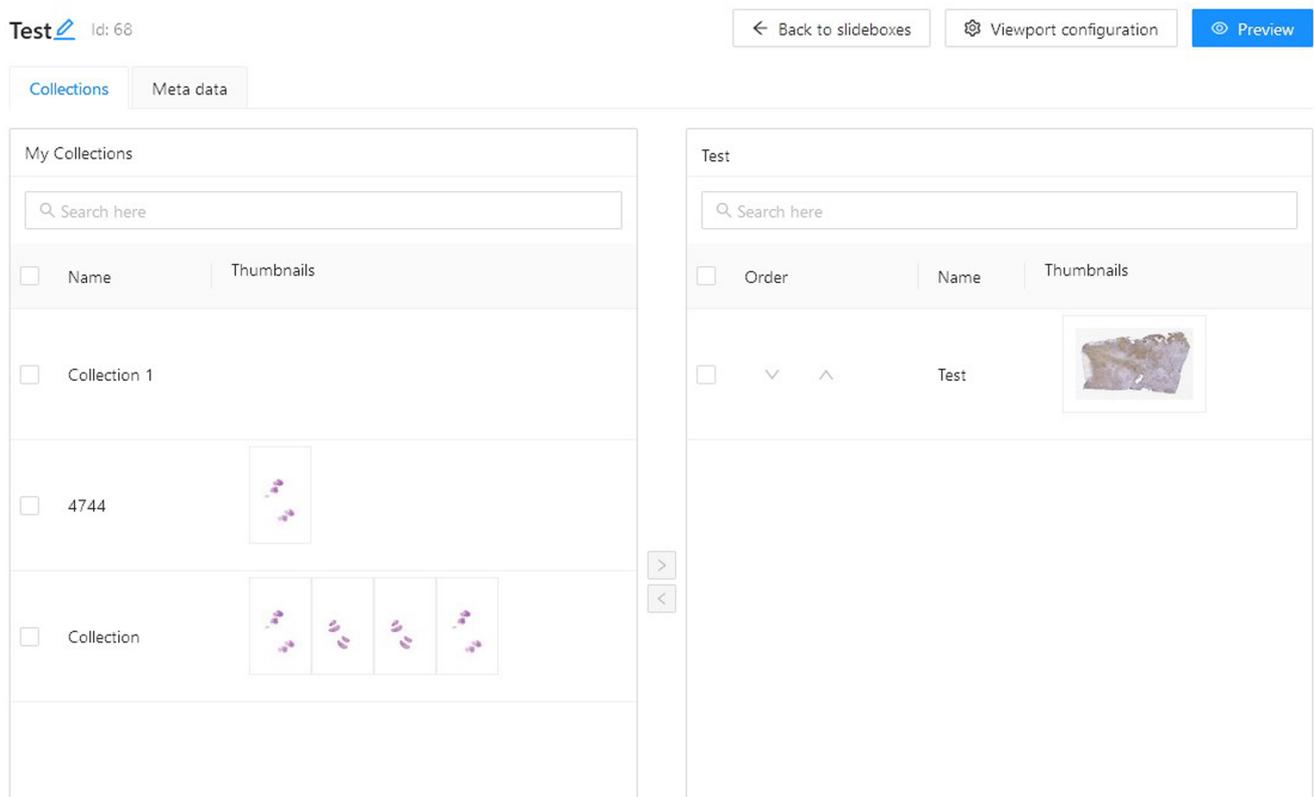

- You can also add meta-data to your slidebox

5) Also for Slideboxes in My Pathomation, you can configure the viewport and decide what people can see and do. Click on “viewport configuration” to choose how people can look at your slides.

6) Return to the list, by using the “Back to slideboxes” button, or preview your newly created slidebox by clicking on “Preview” button.
