

My Pathomation wiki start page

My Pathomation is a cloud platform offering services for digital pathology applications.

With My Pathomation you can store and share images for all scanner file formats. It comes with advanced features like annotation tools, collection organisation, access management and student course building. Registered users can store whole slide images (WSIs) and share them in an easy and universal way.

Register

an individual or organisation account

Upload

your digital pathology slides from your drives to the My Pathomation cloud

Share

individual slides and slide collections with others either private or public

Teach

with live digital slide microscopy in your presentations or classes

Learn

at your own pace in on-line courses for students that have text instructions and interactive digital pathology slides

Organisations in My Pathomation have multiple user profiles including managers, content editors and members, each with different access rights. Whole slide images can be organised in folders but also be part of Collections, which in turn can be part of Slideboxes.

The tag features provides an additional layer of data for identification. My Pathomation comes with a course builder tool and easy setup and management of groups and access right to all content.

My Pathomation offers free image storage up to 10GB. For storing larger volumes of images, a monthly, volume-based subscription fee is required starting at 30 EUR for 25GB storage. Users can increase and decrease their required storage volume as required per organisation or personal workspace. There is no upper limit for the storage volume.

The My Pathomation cloud platform is compatible with all routine whole slide image formats. If you find a filetype that's not included that you'd like to use, we'd love to hear from you so we can integrate it into our platform!
