

# My Pathomation Start Page

My Pathomation is a cloud platform offering services for digital pathology applications. My Pathomation supports a wide range of image file formats including fluorescent and Z-stacked images. Users can both create a personal space or run an organisation with multiple members.

## Features

### Register

Choose the account that fits your needs

### Upload

Add digital slides from any scanner from your drives to your secure My Pathomation cloud workspace

### Share

Send slide collections or individual cases to peers, privately or publicly

### Learn

Study with interactive slides and participate in self-paced courses and exams

### Teach

Put a microscope in your course content and into your presentations or virtual classes

### Explore AI

Access image analysis tools without needing IT integration – Just pick & go

## My Workspace personal account

Your personal My Pathomation workspace lets you store, organize, and share whole slide images (WSIs) from any scanner file format.

It includes powerful features like:

- Unordered List Item Annotation tools to mark up slides
- Unordered List Item Slide collections to keep your images organized
- Unordered List Item Image sharing via a QR-code, email, and much more for quick collaboration
- Unordered List Item Tags to easily describe and filter your slides

Use tags to quickly find the exact slides you need—no more endless searching.

Start with the Free plan, which includes 10 GB of storage to explore all features. Need more space? Upgrade to the Personal plan for unlimited access and expanded storage.

## Organisations group account

Organisations for multiple users have more to offer. You can create groups, invite users to join, give them different access rights and decide when group members can access content.

Compared to a Personal plan organisations in My Pathomation offer many interesting additional features depending on the plan you prefer.

The **Education and Collaboration plan** is great for building educational content or collaborating with other researchers. This plan includes featuring your fully interactive slides in [courses](#) and [quizzes](#), and adding your own [personal branding](#).

The **Case Sharing & AI plan** gives you access to a menu of AI algorithms and has both case sharing and group features. It is great for Pathologists that want one place where they can share cases with colleagues for review and advice or explore if AI can help out to make that difficult score. Researchers that want to explore the utility of AI algorithms or analyse a data set fast will also find this plan useful.

## Plans and Pricing

My Pathomation offers a free plan to explore the functionality with a 10GB image storage. For storing larger volumes of images, a monthly, volume-based subscription fee is required starting at 30 EUR for 25GB storage. You can create organisations with up to 50 members by adding an additional monthly fee. Users can increase and decrease their required storage volume as required per organisation or personal workspace. There is no upper limit for the storage volume. Contact us at [info@pathomation.com](mailto:info@pathomation.com) for a personalised proposal

Free Plan	Personal Plan	Education & Collaboration	Case Sharing & AI

## We Support You(r file types)

The My Pathomation cloud platform is compatible with all routine whole slide image formats. If you find a filetype that's not included that you'd like to use, we'd love to hear from you so we can integrate it into our platform!
