

Accessing the system

In order to access PMA.control, you must log in using your credentials. Depending on the configuration, self registration may be available, whereas you can create an account for yourself. In any other case, the credentials will be provided to you by the managers of the platform.

The screenshot shows the PMA.control login page. At the top, there is a logo with a gear icon and the text 'PMA.control'. Below this is a 'Login' section with two input fields: 'Username, email' and 'Password'. The 'Password' field has a lock icon on the right. Below the password field is a checkbox labeled 'Keep me logged in' which is checked. To the right of the checkbox is a 'Sign In' button. Below the 'Sign In' button are two links: 'Forgot password?' and 'Click here to register'. At the bottom of the page, there is a logo for 'PATHOMATION' with the version 'v2.0.0.619' and 'PMA.core 2.0.0.622 ready' in green text. Below this is a link 'Log in dialog'.

PMA.control is a web application designed to operate efficiently using modern web browsers. It is fully functional whether accessed from a desktop workstation or a touch enabled tablet. Devices with smaller screen size, such as smartphones, are compatible but not recommended, due to the limited available screen real estate.
