

## Accessing the system

In order to access PMA.control, you must log in using your credentials. Depending on the configuration, self registration may be available, whereas you can create an account for yourself. In any other case, the credentials will be provided to you by the managers of the platform.

PMA.control is a web application designed to operate efficiently using modern web browsers. It is fully functional whether accessed from a desktop workstation or a touch enabled tablet. Devices with smaller screen size, such as smartphones, are compatible but not recommended, due to the limited available screen real estate.
