

Introduction

PMA.control is a dedicated tool for training, re-training, tuning and testing of histopathologic tests or scoring systems.

It can be used for:

- training and retraining a scoring algorithm/system - tuning for an existing scoring algorithm/system (e.g. HER2 scoring system) - development of new scoring algorithm - ring studies

PMA.control is intended for use at departments of pathology and universities for education of students in (bio-)medical science and histologists, cytologist and histopathologist.
