

What's new in version 2.1?

Pathotrainer 2.1.0 is a commit (1f204cca) of the Pathotrainer codebase (previously known as PMA.control). It follows __. It is a major release that contains a multiple new features and bug fixes.

New Features

- CTRL-96: Users can now make annotations in a session. These are only visible to supervisors, and the supervisor is able to filter them
- CTRL-97: Sharing of WSIs and ROIs is now possible
- CTRL-98: Project owners / Supervisors can now set how all image labels will be displayed (i.e. filenames | captions | no label) with a single click in the Training Session options.

Bugs fixed

- CTRL-145: Fixed bug in which WSI content would not load in Course Mode

Known issues

- Gamma parameter when passed by the client side, has no effect for CZI files(CORE3-68)
- Clicking on a user of a group returns an error (CORE-248)
