

Scoring cases

If test active mode has been enabled for you by the supervisors, you can score each case of a case collection by filling in the form fields. Sometimes you might need to scroll down to the bottom of the right column, below the slide list to view the form:

The screenshot shows a mobile application interface for scoring cases. At the top, there is a dark header with a left arrow, the text "case03" with a dropdown arrow, and a right arrow. Below the header is a "Sync" checkbox. The main content area contains two case items, each in a white box with a blue border. The first item is "1_HE-1.1.mrxs" with a star rating of 4.5. The second item is "2_CD138-1.1.mrxs" with a star rating of 3.5. Below the case items are two input fields. The first is labeled "IC%" and contains the text "area covered by immune ce" with a dropdown arrow. The second is labeled "POS/NEG" and is empty with a dropdown arrow. At the bottom are two buttons: "Submit" and "Reset".

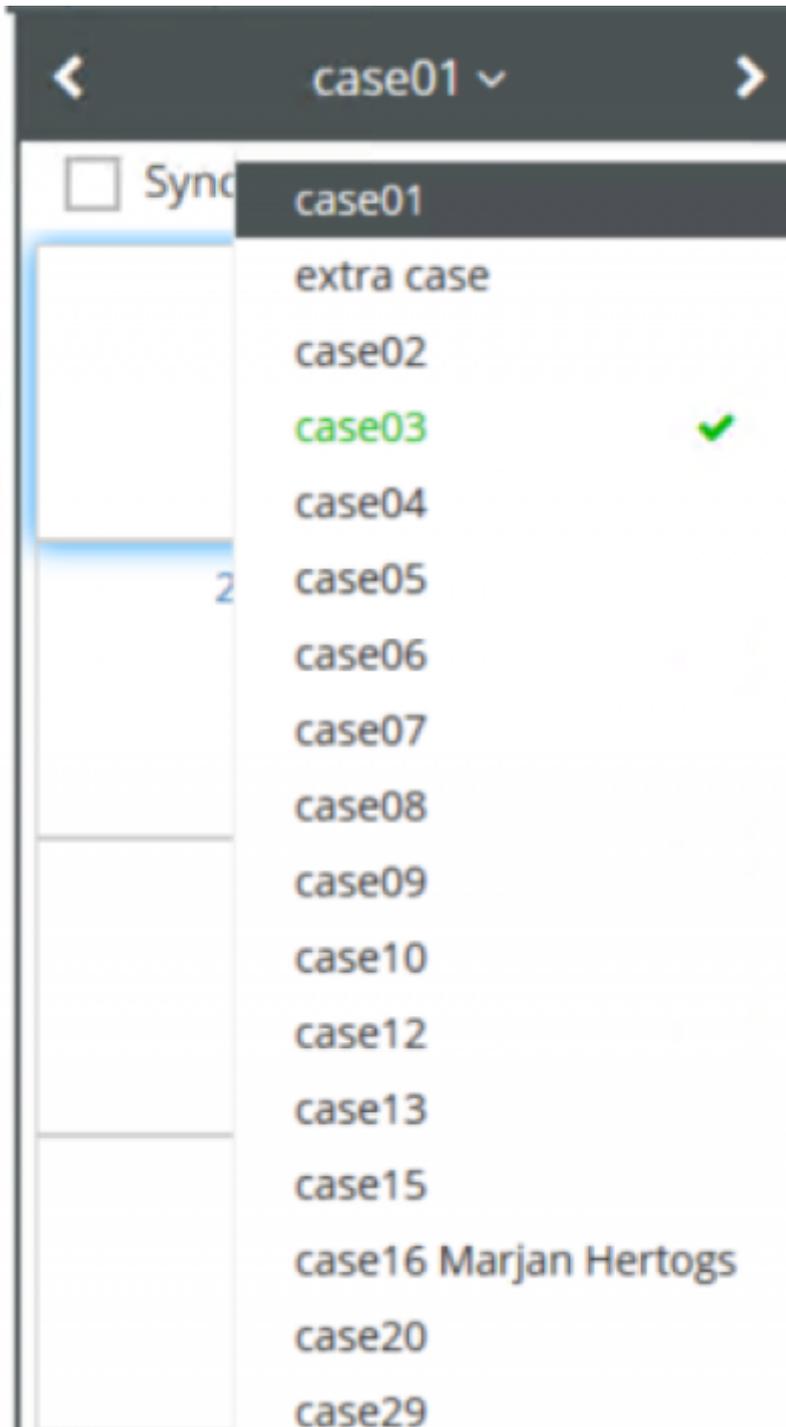

In case an error occurs, a prompt will appear. You can close the prompt, correct any errors and submit the form again:

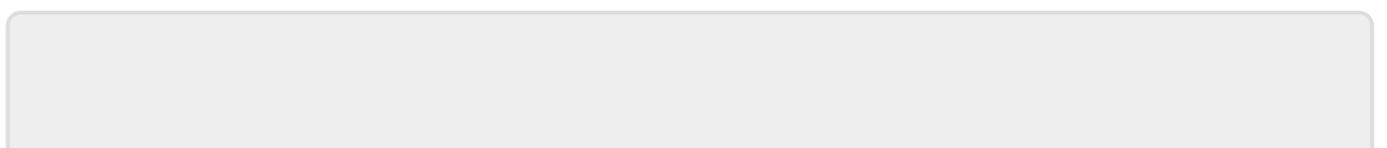

You can correct any individual field errors and submit again:

As you complete each case, the system displays the forms that you have already scored, by expanding the list of cases:

Finally, you can track your progress as well as overview all the cases you have scored so far, from the session main page and the score report page:
