

What is the PathoTrainer ?

The PathoTrainer is a dedicated tool for creating virtual spaces in which digital pathology education, data collection, and testing of pathologists with or without AI support are all facilitated.

PathoTrainer has two major components:

1. The Training Sessions, which are only visible to invited users and are the virtual rooms in which cases can be viewed, forms can be filled, discussions can be had etc.
2. The Content Management admin menu in which training sessions, images, etc are created.

Possibilities:

PathoTrainer is used by:

- Pharmaceutical companies
- Pathology departments
- Research institutes
- diagnostic AI companies
- Universities
- and Quality control organisations.

You can use it for:

- Design, development and validation of new scoring algorithms/systems, including an AI/ML algorithm
- Live classes to broaden awareness of biomarker scoring algorithms
- Creating independent self-directed biomarker courses for pathologists
- Training and retraining a scoring algorithm/system
- Tuning for an existing scoring algorithm/system (e.g. HER2 scoring system)
- Ring studies and surveys
