

Reviewing Score Results

After you've collected data from your participants, you need to be able to review their submitted scores and see their scores.

PathoTrainer will automatically grade participants if your consensus / ground truth data is already available, and you can view these results in several ways:

- Side-by-side with the slides themselves in the Review mode
- As a table overview in the Comprehensive Score Report
- Exported to Excel and other formats.

Additionally, as of PathoTrainer 2.2.0 (NOV 2025) it is now possible to filter results based on User Country if known.

Learn how to view, filter, and export results in the video below:
