PMA.studio

Welcome to PMA.studio, an integrated web-based environment for whole slide image (WSI) data, digital pathology, and virtual microscopy alike, developed by Pathomation.

As of 2022, PMA.studio (and PMA.vue) replaced the original Pathoma. As of it being discontinued and replaced, some users still find the original software is a superior product for some tasks.

PMA.studio is part of the Pathomation software platform for digital pathology. The platform consists of different components. Whatever your scenario for digital pathology, that you're going to interact with digital slides at some point, PMA.studio is the right choice.

The PMA.studio wiki is available at <https://docs.pathomation.com/pma.studio>
