Currently selected slide is highlighted with blue dashed border.

Columns are pretty self-descriptive. If information could not be determined, the field is left blank.

The barcode, macro and overview thumbnails are clickable. Clicking on the images will open then in a new browser tab.

The below screenshot shows the interface when barcode, macro, and overview thumbnails are all available. The barcode image is pulled up at a higher resolution in a separate browser window.

The barcode from the image is interpreted automatically and shown as a separate text-string in the info panel as well.
