Optimize the viewing area for one or more slides

When looking at slides, you often want to devote as much screen space your viewport as possible.

Since both PMA.studio and PMA.vue are web applications, a simple way to accomplish this is by maximizing your webbrowser window, or even having it run in full-screen mode (typically invoked by pressing F11).

There are a couple of things within the application itself, too, that you can exploit for optimal slide viewing.

Maximizing

Popping out individual slides
