Server visits (administration)

This page list down all the different visits to PMA.Studio. Records can be filtered through PMA.core server url, username and date of visit. Each row consists of:

1. PMA.core server url accessed
2. PMA.Studio username used for login
3. Date of visit
4. Status of success/failure on login
5. IP address through which the user connected
6. Browser/Device used to login
