Whats new?

PIMS LS 2.2.0

Visual & Workflow Overhaul
Change

Much has been changed for this new incarnation of PIMSLS.

- The icon library has been completely revised
- The ribbon has been reorganised according to pathologist feedback to populate the home tab with most used features, and organize tabs in the order they are usually needed
- The annotation panel has been revised to get rid of dead space, and you can now proceed through annotations with the previous/next buttons
- The colour adjustment panel has been streamlined to make adjustments faster and easier
- The loading of annotations is made clearer to the user on annotation-heavy slides
- The software has been updated to reflect it's new name PIMSLS

Conference
Feature
The natural successor to the multi-head microscope is now available in the Conferencing tab. Navigate, annotate, and collaborate together on the same slide with just a couple of clicks.

Annotation Text Editing
Change
Text annotating is now easier and you can dismiss the window if you just want to keep the placeholder text

Helpdesk links
Change
We've updated the links throughout the software to take you through to our helpdesk

Snapshots
Bugfix
Exporting snapshots to TIFF now exports in TIFF rather than PNG
