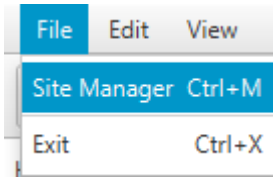
# About the site manager

The site manager aims to make it easy for end users to store connection data related to the different Pathomation server instances (PMA.core, Pathomation cloud…).

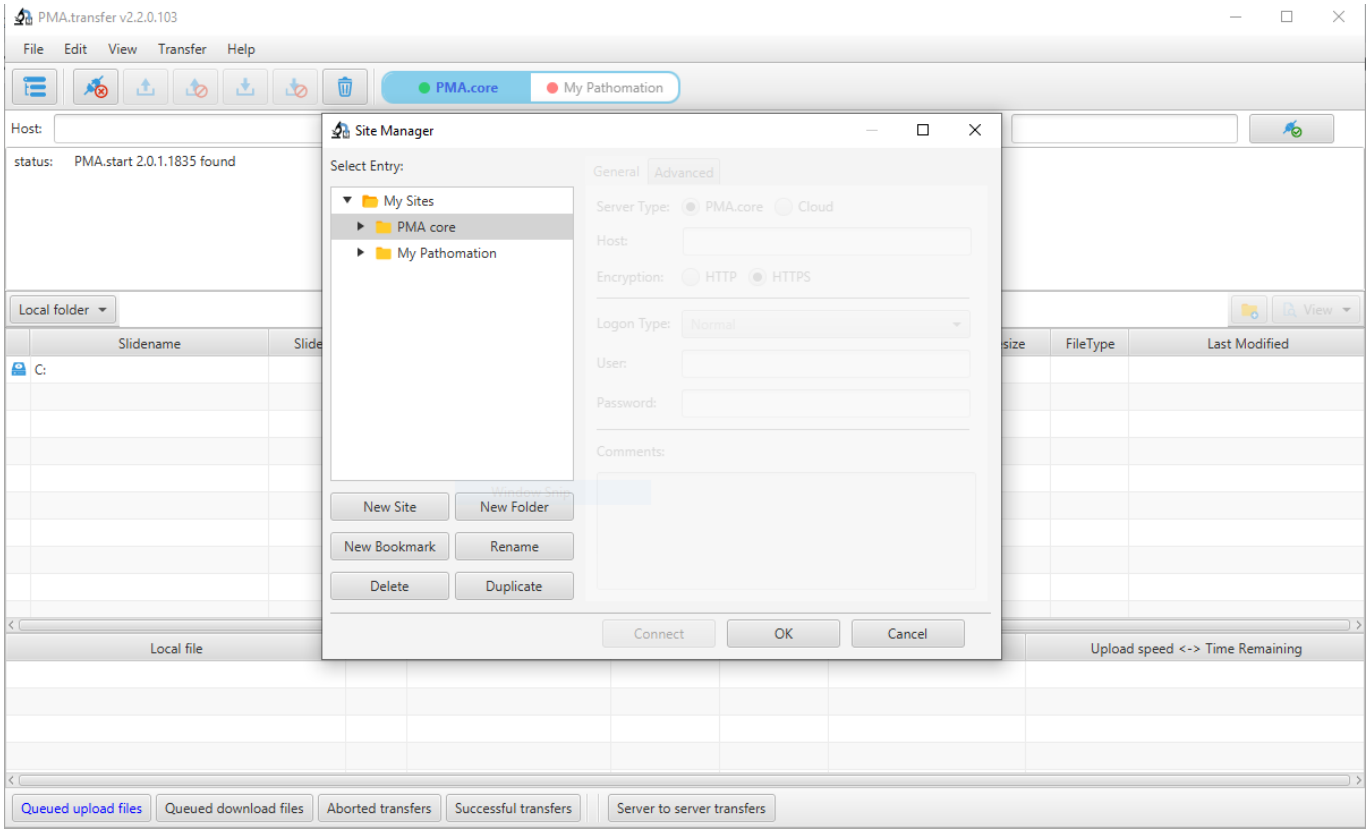
It can be initiated via :

- click on button “Site Manager” (first to the left on the icons toolbar)

- click on Menu item “Site Manager” on Menu “File”.



- Keyboard shortcut “Ctrl + M”.



It enables end users to organize connection data into folders, sites, bookmarks in addition to a couple of others functionalities (rename, duplicate…) The data generated by the site manager is stored inside file “PMA.Transfer_data.json” on user’s default Windows directory :
