Initiated via mouse right click within the table view borders, it's composed of six menu items : "Open slide in PMA.core", "Download slide to local folder", "Rename slide", "Delete slide", "Inspect slide", "Copy full path".

Open slide in PMA.core :

Opens selected slide in PMA.core viewer

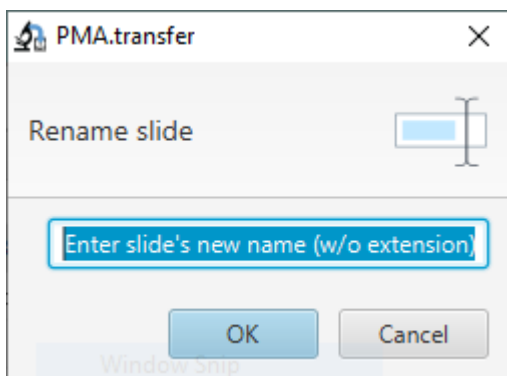

Download slide to local folder :

Has been discussed in details earlier on this tutorial.

Rename slide :

Click on this option pops up the following window :

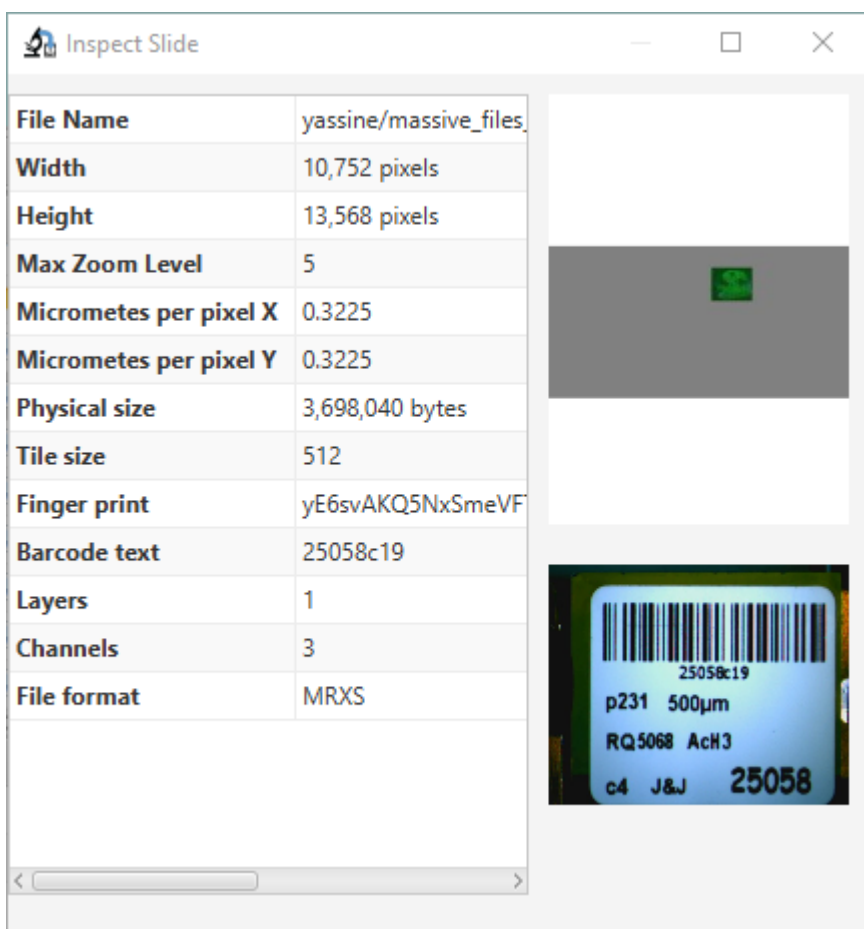

The slide name to be introduced should not include the extension and the new name shouldn't be already used on a slide on the same folder.

#### Delete slide :

A confirmation window asks for delete confirmation, once confirmed the slide is removed completely from the server (warning : this action cannot be undone).

#### Inspect slide :

Information data regarding the slide (Thumbnail, barcode, fingerprint, size...)

#### Copy full path :

Copies the full path of the remote slide to the clipboard.
